

The diagram illustrates a data transformation process. On the left, a smartphone icon contains a vertical list of user names: 'User1', 'User2', 'User3', 'User4', and an ellipsis '...'. An arrow labeled 'solution' points from this phone to a second phone on the right. The second phone's screen displays a table with four rows, each corresponding to a user. The first three rows are fully visible, showing the user name in one column and 'User ID, Name, Email' in another. The fourth row is partially obscured by the phone's edge. An ellipsis '...' is shown below the table on the phone's screen.
